Trial-level LOO
Leave-one-session-out
D+crit bias follows amplitude
D+crit+order both
D+order bias drifts over time
D+shared daily bias shared by hands
E+shared E + daily bias shared by hands
E = D4+crit
C+LKPS D + bimanual slope
C+LPS C+LP + bimanual slope
D = C+LKP
C+LK C+L, lapses depend on amplitude
C+L own bimanual lapses
C+LPMdist C+LP + judges the distractor
D4 distractor terms fixed
C+LP own lapses + presence
C+LMmax C+L + stronger vibration
C+LPMmax C+LP + stronger vibration
D1 lapses fixed
B-fixlapse lapses fixed
D3+crit D3 + bias follows amplitude
D2 D1 and D4 combined
B separate uni / bi hierarchies
C+Mmax judges the stronger vibration
B-wide wider lapse prior
D3 only the bias varies
C+Mdist judges the distractor
C shared curve, amplitude offset
D0 no session differences
A pooled, no session differences
